Dear Colleagues

The health of mothers and children is central to global national concerns. Improvements in maternal and survival are two important Millennium Development Apart from the obvious linkages between health mmmers, mother and child health is intimately bound th economic development, education, gender issues and . Although most pregnancies and births are uneventful, ximately 18% of all pregnant women develop a sially life-threatening complication that calls for skilled and some will require a major obstetrical intervention to ve. For an individual woman, the risk of maternal death uenosed both by the risk associated with pregnancy and by umber of times she becomes pregnant. Each time a woman e pregnant, she runs the risk of maternal death again, and isk adds up over her lifetime. In developing countries, where mortality and fertility tend to be high, the lifetime risk of al death can be astoundingly high. One way of reducing al mortality is by improving the availability, accessibility, and use of services for the treatment of complications arise during pregnancy and childbirth. These services are atively known as Emergency Obstetric Care. We the health mbers of C.S.I. St. Luke's College of Nursing wish to e knowledge and skill towards basic obstetric emergency and new born care through the state level seminar a obstetric emergency and new born care." Nursing challenges ill be held at Multipurpose hall, C.S.I. St. Luke's College esing, Nazareth on 8th February 2018 from 7.30 am to 5.30 p.m.

im of this seminar is to equip the participants with current eges and skills on basic obstetric emergency care and orrn care to provide effective and excellent nursing care to others and their babies in the hospital and in the community.

Objectives

- Update knowledge regarding basic obstetrical emergency care.
- Identify the evidence/risk factors for Emergency Obstetric and Newborn Care interventions.
- Apply the knowledge and reduce maternal and perinatal morbidity and mortality.
- Ensure safe motherhood and healthy newborns.
